

Swep Single HygienePlus Pro

Single-sided mop for use in hygiene-sensitive areas

Product Description

Swep Single HygienePlus Pro is a single-sided microfiber mop with a unique 3-D honeycomb pile structure that offers **high dirt pick-up capacity and adaptability to uneven surfaces** with integrated brush fibers that offer superb cleaning of smooth or structured floors in hygiene-sensitive areas.

Swep Single HygienePlus Pro is a symmetrical, low friction mop suitable for dry, damp and wet cleaning processes. It is designed to be used as a pre-prepared system in all areas with cleaning capacity of > 20m². It has unmatched durability – machine washable up to 1,000 times.

Application

Swep Single HygienePlus Pro can be stored after washing in damp conditions in a clean pre-box without tumble drying for up to 72 hours without bacteria growth*.

Advantages

- ✓ Microfibre dirt-removal power for use in hygiene-sensitive areas
- ✓ Unique brush fiber, 3-D pile construction
- ✓ Contains the preservative silver phosphate glass
- ✓ No need to tumble dry: can be stored in damp conditions in a clean pre-box after washing for up to 72 hours without bacteria growth*
- ✓ Up to 99.99% bacteria removal tested with P.aeruginosa & S.aureus on vinyl surfaces at a third party lab
- ✓ High durability up to 1,000 washes
- ✓ Recognized by ErgoCert as part of an ergonomic system when used with Swep r-Frame and either the Telescopic Handle or r-Ergonomic Handle

- ✓ Colour coded tags and finger loops; arrow on backing for mopping direction
- ✓ Single-sided, cost effective, less mops to buy, wash and use

Washing recommendation

Recommended washing conditions: 70°C. Maximum washing temperature: 95°C. Avoid high alkalinity and strong bleaching activity (do not use chlorine bleach). Tumble dry at low heat.

How to use

Mop preparation in the washing machine:

- ✓ Take mops out of machine, fold them once or lay them flat with the finger loop on top and put them in the box
- ✓ Prepare mops by adding cleaning detergent in the last rinsing process

Manual mop preparation:

- ✓ Prepare the cleaning solution in a bucket
- ✓ Fold mops once or lay them flat with the finger loop on top, and put them in the box
- ✓ Put sieve on box and pour the cleaning solution evenly inside
- ✓ Let the solution distribute evenly into the mops

Continue with the cleaning process (pre-prepared method):

- ✓ Take the mops by finger loop out of the box, put it on the frame
- ✓ Adjust telescopic handle to correct height
- ✓ Start mopping in guided cleaning direction (closed mop side)
- ✓ After use, take away loose dirt particles by brushing the mop
- ✓ Wash the mops
